AI Use and Data Privacy

MedAssist uses AI tools to streamline business processes, including but not limited to preparing invoices, checking content, reviewing grammar and written word styles and tone, analyzing staffing models, and developing dashboards, etc. These technologies help us deliver faster, more accurate, and cost-effective support-always with your privacy in mind. We do not use your practice data, even in de-identified form, without your explicit written consent. We safeguard your proprietary and patient information at each step. AI is solely used to enhance our services, not to access or share your confidential data.
